

Week 11 – Web Design – Sydney Campus

Instructions for Completing Week-11 lab (Project 2 and Challenge 2)

Lecturer/Tutor: Dr. Farshid Keivanian

Instructions for Completing the Week 11 lab

Let's work through Project 2: Adding Meta Tags and Publishing a Webpage step by step. Here are the instructions:

1. Create a new HTML file named `apply11.html`. Include a comment with your name and today's date.
2. Include all necessary HTML5 elements for a webpage.
3. Create a title for the page and use Credit as the webpage title.
4. Insert a description meta tag with a content attribute and use This website provides helpful information about how to build good credit. as the value.

Instructions for Completing the Week 11 lab

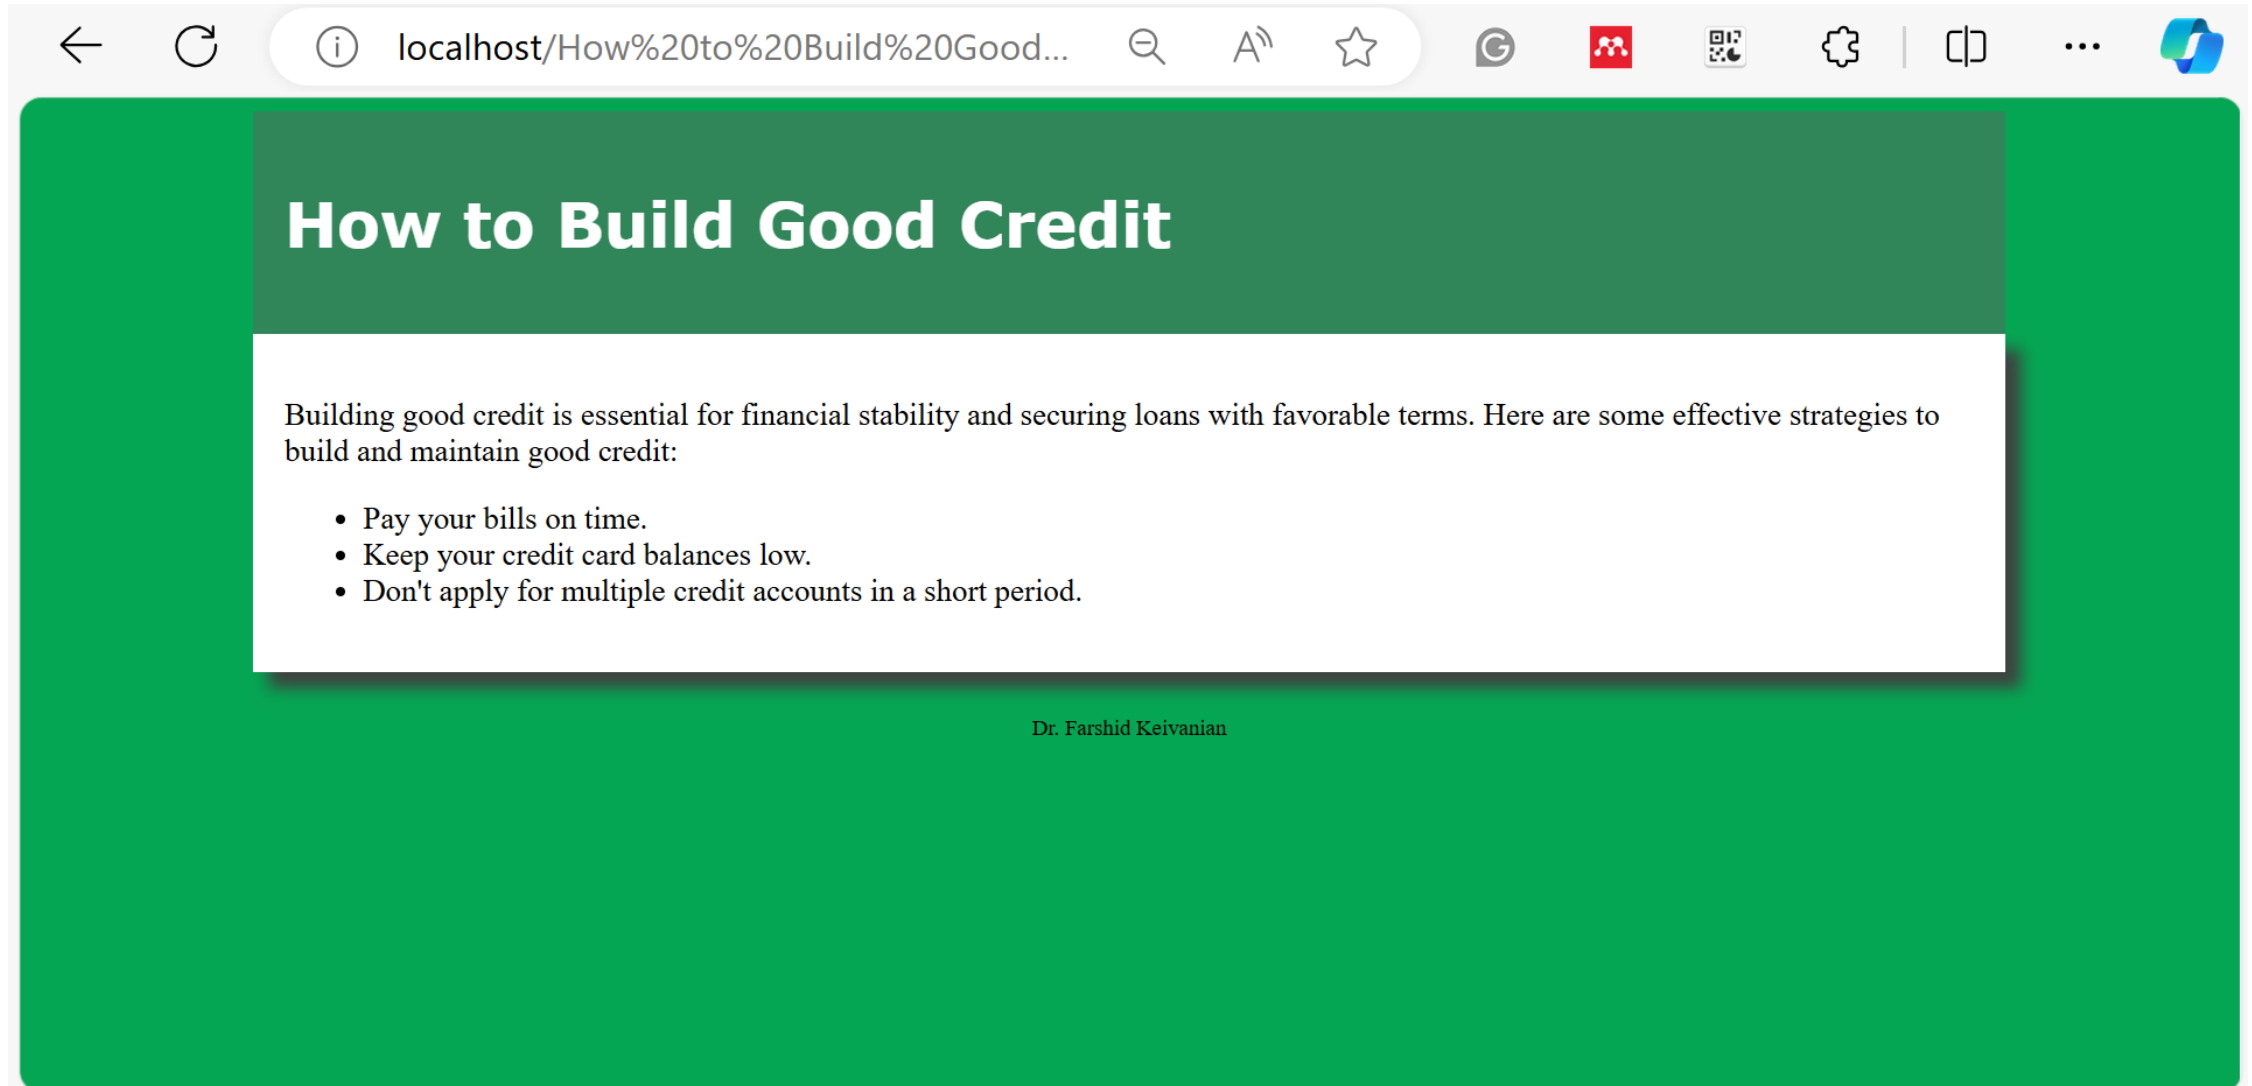

5. Create a header element.
6. Create an h1 element within the header element and include the text How to Build Good Credit as the heading text.
7. Create a main element.
8. Research ways to build good credit and summarize your findings within a paragraph element within the main element.
9. Create an unordered list of at least three steps one should take to build credit. Place the unordered list below the paragraph element, but within the main element.
10. Create a footer element that contains your name.
11. Save your changes.
